The digital divide index score (DDI) ranges between 0 and 100, where a lower score indicates a lower divide. The infrastructure adoption score and the socioeconomic score both in a 0 to 100 range as well contribute to the overall DDI. Listed below each score are the indicators used.

**Infrastructure/Adoption Score**

If this score is much higher than the socioeconomic score, efforts should be made to upgrade the broadband infrastructure.

- **22.646** average maximum advertised download speed in Mbps
- **3.741** average maximum advertised upload speed in Mbps
- **20.0 - 39.9%** of households with a 10/1 broadband connection
- **16.3%** of people without access to fixed broadband of at least 25 Mbps down and 3 Mbps up

**Socioeconomic Score**

If this score is much higher than the infrastructure/adoptions score, efforts should be made to focus on digital literacy and exposing residents to the benefits of the technology.

- **17.5%** population ages 65 and older
- **16.0%** ages 25 and older with less than a high school degree
- **21.1%** of individuals in poverty
- **17.5%** noninstitutionalized civilian population with a disability

**Missed Economic Benefits**

Amount over 15 years if 20% of unserved households had access and subscribed to the service.
