Placemaking Survey

REGIONAL REPORT 2020

Says Who?

Nearly 280 residents of the Wabash Heartland Region responded the COVID-19 Impact Internet, E-Learning and Remote Work Survey between August 10, 2020, and October 10, 2020.

It is important to keep in mind that this is a convenience sample and not a scientific one. Therefore, the typical profile of a respondent is as follows: female (67.1%), either 21-44 years old (44.4%) or 45-64 years old (39%), and has either a Bachelor's degree (32.9%) or higher (25.6%).

While all counties in the WHIN region were represented, most respondents came from Warren (23%), Clinton (19%), or Pulaski (15%) counties. This breakdown is particularly noteworthy, as Warren county has the lowest population size in the WHIN region based on 2018 U.S. Census Bureau Population estimates.

Internet Access at Home

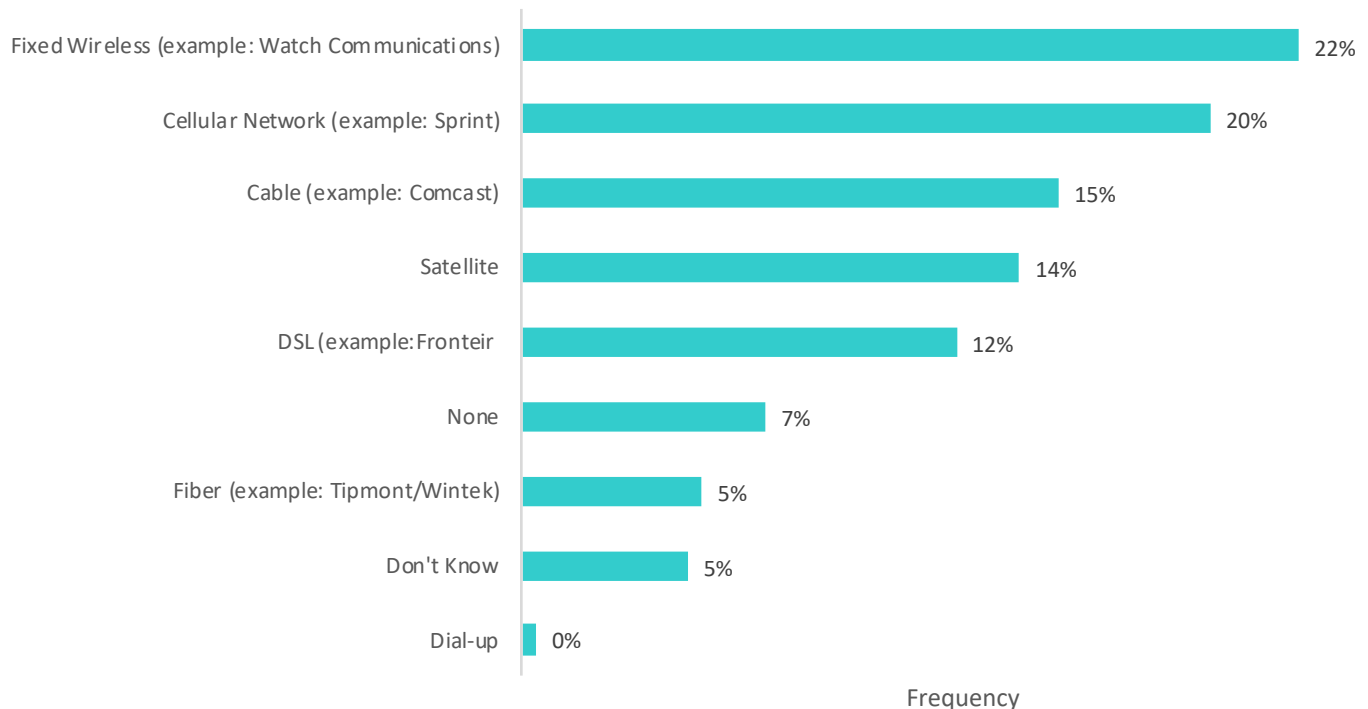

One of the effects of the COVID-19 pandemic is an increased need for internet access at home. Based on this survey, most respondents had either fixed wireless (22%) or cellular network (19.5%). To better understand the implications of these results, be sure to check out the WHIN State of Broadband report, which goes over each type of broadband available in the region.

This survey sought to understand the quality of resident's internet service through asking about resident's ability to do common tasks on their connection. For example, 50.2% of residents reported being able to stream video without interruption "most of the time" while 30.1% said "rarely." The results are relatively the same for video conferencing.

Overall, 43.6% of respondents reported that their internet service adequately meets all their family members' needs "most of the time" and 29.6% reported it rarely does.

22%
of respondents selected Fixed Wireless as their primary type of internet service used at home.

What is the primary type of internet service used at your residence?

■ Don't Know ■ Never ■ All the time ■ Rarely ■ Most of the time

Internet Access at Home

Can you stream a video without interruption?

■ Don't Know ■ Never ■ All the time ■ Rarely ■ Most of the time

Internet Access at Home

Can you use video conferencing (example: Zoom) and similar apps without interruption?

■ Don't Know ■ All the time ■ Never ■ Rarely ■ Most of the time

Internet Access at Home

Is your internet service adequate to meet all your family members' needs?

E-Learning

The second focus area of the survey was E-learning. The intent of this section was to learn more about how the pandemic has impacted families and their school-age children across the 10-county region. Based on this survey, over half (62.3%) had child(ren) attending K-12 schools. Of those respondents, 26% felt very comfortable supporting their children with learning and educational concepts and 25% felt somewhat comfortable.

When it comes to the digital divide, access to devices must be taken into account along with internet connection. Based on this survey, a Chromebook is used by 36% of children attending K-12 schools as their primary learning device to complete schoolwork. The Chromebook is rented from or provided by a school, church, library or other local community organization.

Survey results also provide insight into shared internet usage. Twenty-seven percent of respondents reported that their children can do their schoolwork "most of the time" at home despite other family members using the internet at the same time in comparison to 16% of families who reported "rarely."

Do you have a child(ren) attending K-12 schools?

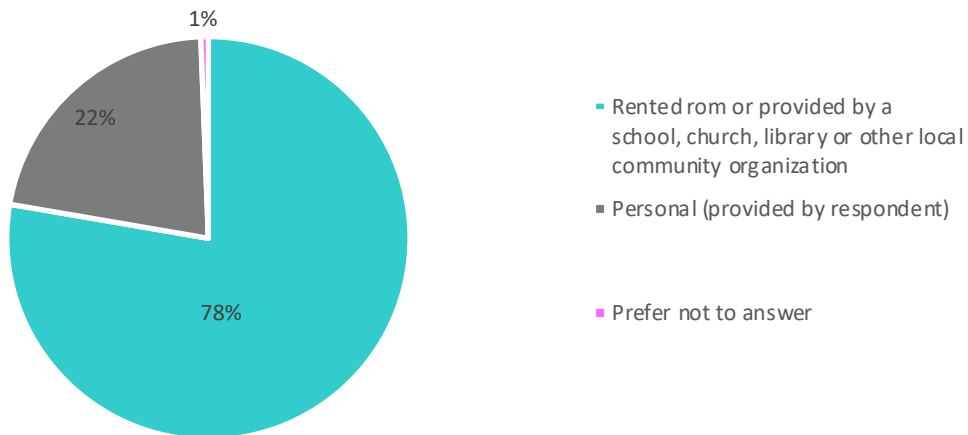

E-Learning

What is the primary learning device your child(ren) most often use to complete schoolwork remotely?

E-Learning

The learning device your child(ren) uses is: (Check all that apply)

E-Learning

Is the learning device shared with others in your family?

E-Learning

How many family members share the learning device?

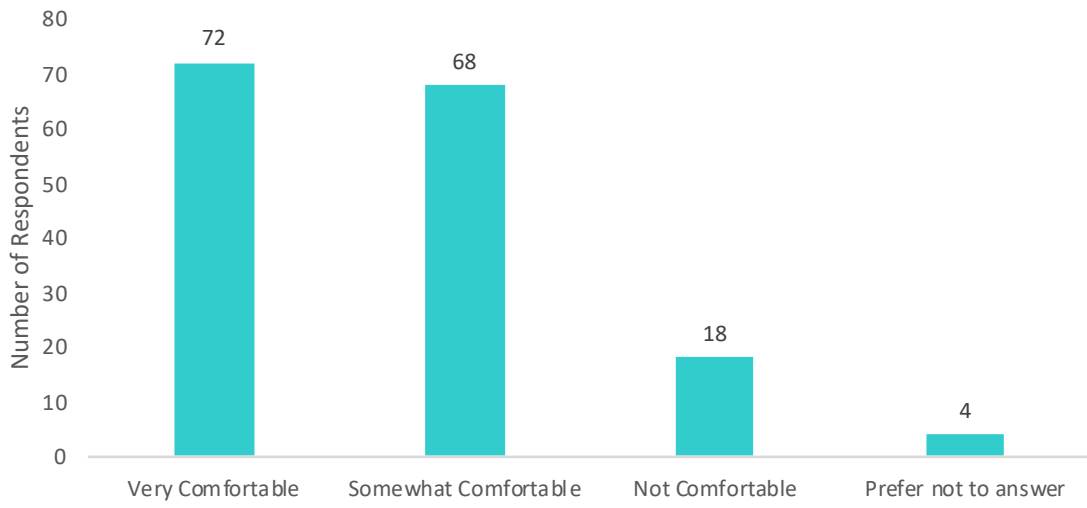

E-Learning

Is your child(ren) able to do school assignments at home without consideration of other internet users in the house (for example, is your child able to do school assignments at home despite other family members using the internet at the same time)?

E-Learning

Is your child(ren) dependent on a community-based organization or school to provide internet connectivity (example: hot spots) to do schoolwork remotely?

E-Learning

I am comfortable supporting my child(ren) with learning the educational concepts in their remote homework?

Remote Work

The third focus area of the survey was remote work. The purpose of this area of the survey was to explore and better understand the dynamics of remote work and its impact on the WHIN region communities, in particular, the workforce.

Of those who responded to the survey, 78.3% reported to be employed. Nearly 30% said their job status had not been impacted at the time they took the survey.

Of those employed, 30% reported to be working from home and receiving some sort of technical equipment/support from their employers.

When respondents were asked about their quality of internet usage at home, 18% reported that they were able to work from home 'most of the time' despite other family members using the internet at the same time.

Regarding household members' employment status, 18.4% of survey participants reported to have household members who were full-time essential workers, with 37.1% versus 62.9% working from home.

of respondents
said home is the
workplace location
when working
remotely.

Are you currently employed?

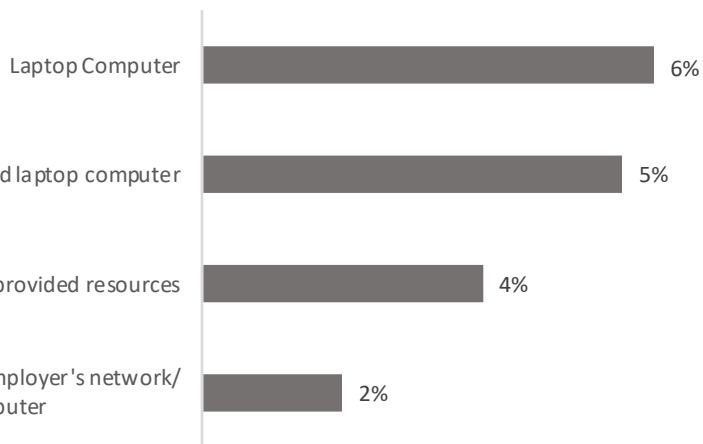

■ Yes ■ No

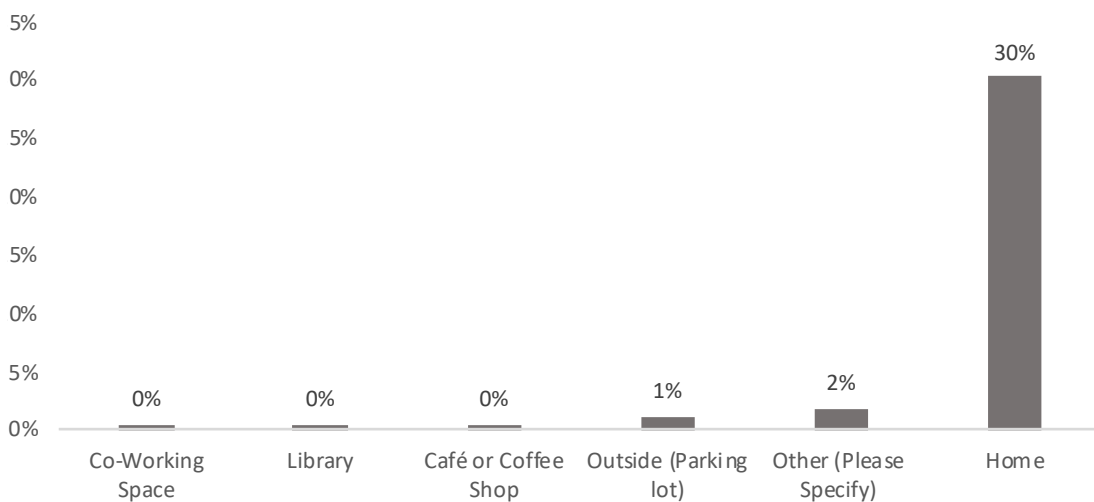

Remote work:

Because of COVID-19, is any member of your household working from home?

Remote work:

What resources does your employer provide to enable you to work remotely (please check all that apply)?* Note: It won't add to 100% because of the small number of respondents who answered this question.

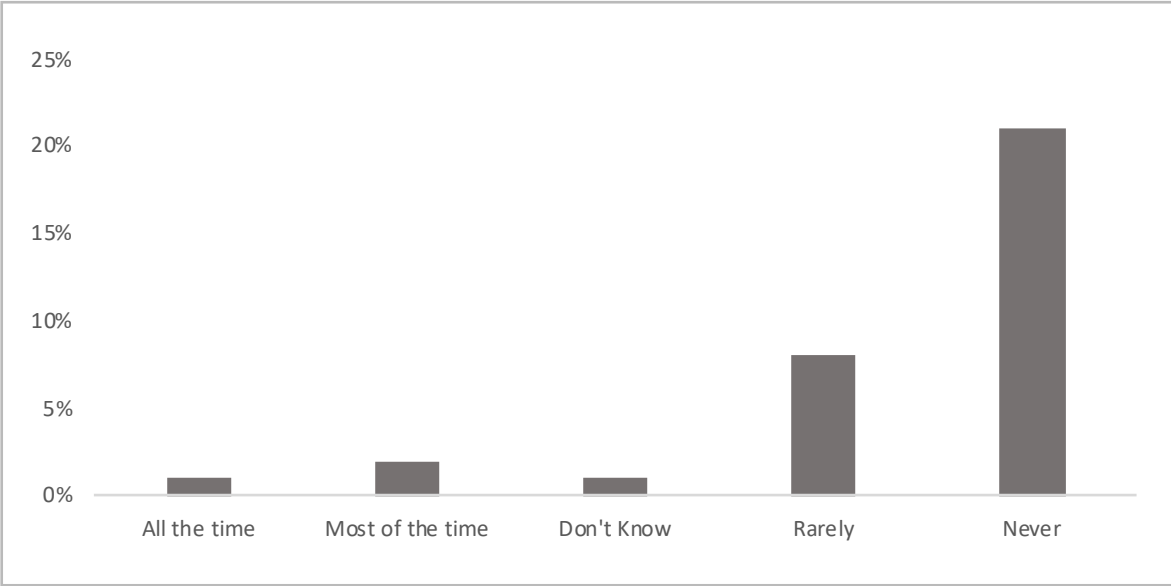

Remote work:

Where do you work most often when working remotely?

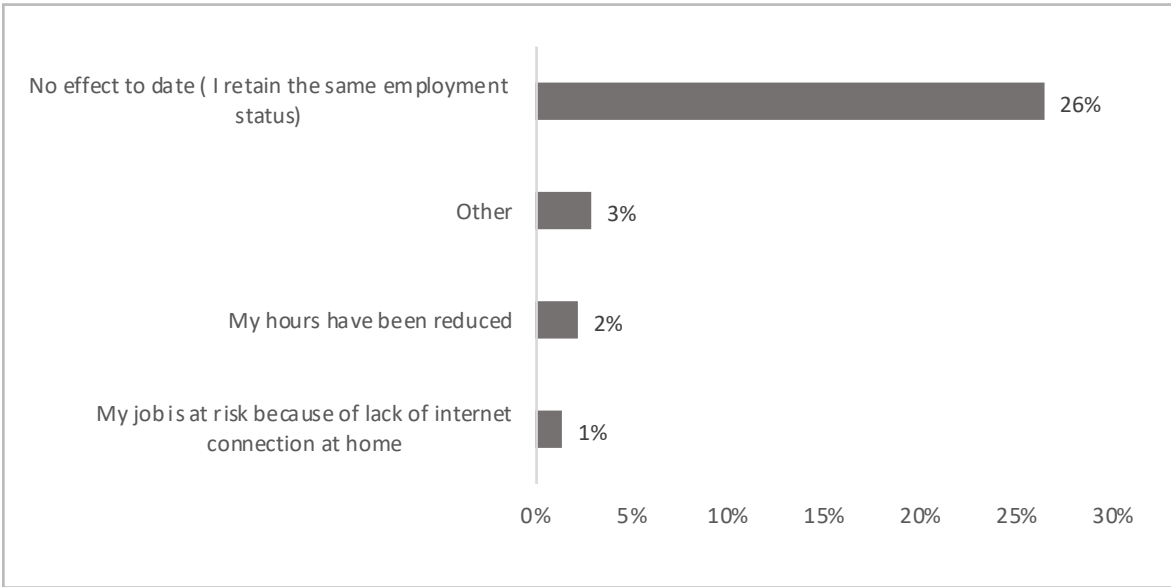

Remote work:

Are you able to work at home without consideration of other Internet users in the house (for example, are you able to work from home most of the time despite other family members using the internet at the same time)?

Remote work:

Are you dependent on a community-based organization or school to provide internet connectivity (example: hot spots) to do your remote work?

Remote work:

How has COVID-19 affected your job status? (Check all that apply)

Remote work:

The current job status of members of my household is: (Check all apply.) Essential workers examples: Critical retail: grocery stores, hardware stores, mechanics; Critical trades: construction workers, electricians, plumbers; childcare; health care; transportation; agriculture and food production; water and wastewater; nonprofit and social service organizations.
